It will then prompt you to save a .zip file. Save it to your desktop or wherever you want to save it on your computer.

When you open the .zip file, it will be a folder with .tif, .doc, .pdf items. The items will be named a number. The number is how the iPERMS system indexes the documents in your record.

If you sort the items by name, the biggest numbered item is the newest document added to your record.

You will have to do some clicking around to find your more important documents (i.e. DD214s)
